I'm announcing a new project! I'm taking Chicken Fighters 2k12 and turning it into a Chicken Fighters 2000 style game. It will use Silverlight and C#. Will be a "web" game that you can play anywhere in a browser with Silverlight. So, yes you can play it on a Windows Mobile Phone. I dont know when I'll have it ready, but below is a screenshot. After I practice and complete this game I will work on an RPG mobile game.
